Amendments to the Claims

Please amend the claims as follows:

1. (Currently amended) A method for providing shortcuts in a mobile electronic device, the method comprising:

providing a an application neutral shortcut data store that maintains shortcut data for a plurality of application types, wherein the shortcut data store is configurable to include contain a lookup table that associates tags with different types of targets, wherein the targets comprise application targets and content targets ~~applications and content associated with the applications;~~

monitoring user input to the mobile electronic device from a shortcut application;
determining whether the user input is a shortcut input, wherein the shortcut input comprises a shortcut tag, and further wherein the shortcut tag corresponds to a shortcut target in the lookup table;

~~if the user input is a shortcut input,~~ locating the shortcut target in the lookup table based on the shortcut tag when the user input is a shortcut input;

~~when the located shortcut target is an application, executing the application~~ when the located shortcut target is an application; and

executing the application and automatically opening the content data when the shortcut target is a content target.

~~when the located shortcut target is content associated with an application, executing the application to access the content.~~

2. (Previously presented) The method of Claim 1, wherein the types of targets include at least one selected from a group comprising: telephone numbers, email addresses, uniform resource locators (URLs), and contact cards.

Claims 3-5 (Cancelled)

6. (Previously presented) The method of Claim 1, wherein the shortcut input comprises more than one type.

App. No. 09/862,390
Amendment dated October 6, 2006
Reply to Office Action of July 3, 2006

7. (Previously presented) The method of Claim 6, wherein the types of shortcut input include at least one selected from a group comprising: a speed dial input, a voice input, a menu item selection input, and an icon selection input.

Claims 8-10 (Cancelled)

11. (Currently amended) A computer-readable medium having computer-executable instructions for performing steps comprising:

providing an application neutral shortcut data store that maintains shortcut data for a plurality of application types, wherein the shortcut data store is configurable to include contain a lookup table that associates tags with different types of targets, wherein the targets comprise application targets and content targets ~~applications and content associated with the applications;~~

monitoring user input to the mobile electronic device from a shortcut application;

determining whether the user input is a shortcut input, wherein the shortcut input comprises a shortcut tag, and further wherein the shortcut tag corresponds to a shortcut target in the lookup table;

~~if the user input is a shortcut input,~~ locating the shortcut target in the lookup table based on the shortcut tag when the user input is a shortcut input;

~~when the located shortcut target is an application,~~ executing the application when the located shortcut target is an application; and

executing the application and automatically opening the content data when the shortcut target is a content target.

~~when the located shortcut target is content associated with an application,~~ executing the application ~~to access the content.~~

12. (Previously presented) The computer-readable medium of Claim 11, wherein the types of targets include at least one selected from a group comprising: telephone numbers, email addresses, URLs, and contact cards.

Claims 13-15 (Cancelled)

App. No. 09/862,390
Amendment dated October 6, 2006
Reply to Office Action of July 3, 2006

16. (Previously presented) The computer-readable medium of Claim 11, wherein the shortcut input comprises more than one type.

17. (Previously presented) The computer-readable medium of Claim 16, wherein the types of shortcut input include at least one selected from a group comprising: a speed dial input, a voice input, a menu item selection input, and an icon selection input.

Claims 18-20 (Cancelled)

21. (Currently amended) A method for providing shortcuts in a mobile electronic device, the method comprising:

providing a an application neutral shortcut data store that maintains shortcut data for a plurality of application types, wherein the shortcut data store is configurable to include contain a lookup table that associates tags with different types of targets, wherein the targets comprise application targets and content targets, wherein the content targets include a target to content data within an application that is navigatable to after the initial launch of the application
~~applications and content data associated with the applications;~~

monitoring user input to the mobile electronic device from a shortcut application;
determining whether the user input is a shortcut input, wherein the shortcut input comprises a shortcut tag, and further wherein the shortcut tag corresponds to a shortcut target in the lookup table;

~~if the user input is a shortcut input,~~ locating the shortcut target in the lookup table based on the shortcut tag when the user input is a shortcut input;

~~when the located shortcut target is an application,~~ executing the application when the located shortcut target is an application; and

executing the application and automatically opening the content data when the shortcut target is a content target.

~~when the located shortcut target is content associated with an application,~~ ~~executing the application to access the content.~~

22. (Previously presented) The method of Claim 21, wherein the content data includes at least one selected from a group comprising: a telephone number, an email address, a URLs, and a contact card.

Claims 23-25 (Cancelled)

26. (Previously presented) The method of Claim 21, wherein the shortcut input comprises more than one type.

27. (Previously presented) The method of Claim 26, wherein the types of shortcut input include at least one selected from a group comprising: a speed dial input, a voice input, a menu item selection input, and an icon selection input.

Claims 28-30 (Cancelled)

31. (Currently amended) A mobile electronic device having a an application neutral shortcut data store that maintains shortcut data for a plurality of application types, comprising:

means for providing shortcuts to a plurality of targets in a lookup table of the application neutral shortcut data store that maintains shortcut data for a plurality of application types, wherein the lookup table associates tags with different types of targets, and further wherein the targets comprise application targets and content targets ~~applications and content associated with the applications~~;

means for monitoring user input to the mobile electronic device from a shortcut application;

means for determining whether the user input is a shortcut input, wherein the shortcut input comprises a shortcut tag, and further wherein the shortcut tag corresponds to a shortcut target in the lookup table;

means for locating the shortcut target in the lookup table based on the shortcut tag; and

means for executing the application, wherein the content is accessed when the located shortcut target is a content target ~~content associated with an application~~.

32. (Cancelled)

33. (Currently amended) A computer-readable medium in a mobile electronic device having a display unit, the computer-readable medium having computer-executable components, comprising:

a shortcut data store that maintains short cut data for a plurality of application types, wherein the shortcut data store includes comprising a lookup table that associates tags with different types of targets, wherein the targets comprise application targets and content targets applications and content associated with the applications; and

an operating system coupled to the display unit and the shortcut datastore, wherein the operating system is configured to:

monitor user input to the mobile electronic device from a shortcut application,
determine whether the user input is a shortcut input, wherein the shortcut input comprises a shortcut tag, and further wherein the shortcut tag corresponds to a shortcut target in the lookup table,

if the user input is a shortcut input, locate the shortcut target in the lookup table based on the shortcut tag when the user input is a shortcut input,

when the located shortcut target is an application, execute the application when the located shortcut target is an application, and

execute the application and automatically open the content data when the shortcut target is a content target.

~~when the located shortcut target is content associated with an application, execute the application to access the content.~~

34. (New) The mobile electronic device of Claim 31, wherein the types of targets include at least one selected from a group comprising: telephone numbers, email addresses, uniform resource locators (URLs), and contact cards.

35. (New) The mobile electronic device of Claim 31, wherein the shortcut input comprises more than one type.

App. No. 09/862,390
Amendment dated October 6, 2006
Reply to Office Action of July 3, 2006

36. (New) The mobile electronic device of Claim 35, wherein the types of shortcut input include at least one selected from a group comprising: a speed dial input, a voice input, a menu item selection input, and an icon selection input.

37. (New) The computer-readable medium of Claim 33, wherein the types of targets include at least one selected from a group comprising: telephone numbers, email addresses, uniform resource locators (URLs), and contact cards.

38. (New) The computer-readable medium of Claim 33, wherein the shortcut input comprises more than one type.

39. (New) The computer-readable medium of Claim 38, wherein the types of shortcut input include at least one selected from a group comprising: a speed dial input, a voice input, a menu item selection input, and an icon selection input.
